

STRING CATALOG 2014

CO-POLY PROFILE TWISTED

QUADRO TWIST

This is a square profile monofilament co-polymer + carbon + polyolefin string with a Thermo Foil Cooling Process finish. This revolutionary "square" string offers exceptional and superior playing experience.

Manufactured by a dual process of extension and axial twisting, this high specification co-polyester offers awesome control and comfort from a totally unique string.

The twisted profile surface will enable you to create huge amounts of spin, giving you the ultimate combination of control and power.

Quadro Twist Black has outstanding tension hold and is also highly recommended for the main or cross in a hybrid combination.

Length: 40ft/12m; 660ft/200m

Gauge: 16L (1.26mm)

Color: Black

Construction: Carbon Co-Polyester

Advantages: Power combined with great control and feel.

Comparison: No comparable string is available in the market from other suppliers.

The Official String of

POLY SPIN

Ideal for hard hitters looking for an economical priced string with control for high swing speeds while offering high durability for the gauges.

This Polyester string is without a doubt the best available with proven record for many years both in Europe and the USA, many players will course recognize this string and the benefits it offers.

Length: 40ft/12m; 660ft/200m
Gauge: 17 (1.23mm) • 16 (1.27mm)

Color: Honey
Construction: High specification Polyester String with special lubricant for added spin and durability.

Advantages: Super power, spin and feel.
Comparison: This was sold as TECNIFIBER for many years in the US Same spec as MONOBLAST

POLY POWER

Very good all round economical string with excellent durability and surprising playability for a Polyester of this gauge.

Offered in this extremely popular color at an exceptional price for this quality.

Length: 40ft/12m; 660ft/200m
Gauge: 6 (1.30mm)

Color: Red
Construction: Top quality Polyester
Advantages: All around the string with Super Durability.

Comparison: This Polypower offers great value for the price.

PRO-FEEL

A softer co-polymer construction with Low Molecular weight Technology (LMWT) that gives this superb string an excellent ball pocketing with spin and control.

Because of its special polymers and softeners, it gives the player the comfort as a user friendly string.

A great choice for comfort and durability.

Length: 40ft/12m; 660ft/200m
Gauge: 16 (1.27mm)

Color: Fluo Red - Natural
Construction: Top quality Co-Polyester mixed with enhancing additives.

Advantages: Comfort and durability
Comparison: Totally unique string in the market

PROTOUR BLACK

There are dark clouds on the horizon for your opponent!

This state of the art advanced co-polymer monofilament string comes in the color of the moment and offers awesome power combined with great control and a SOFT feel.

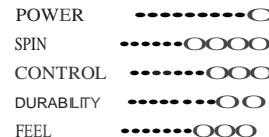

Protour Black provides the best response compared to other conventional polyesters. Its exclusive patented Low Molecular Weight Technology (LMWT) with added olefins and lubricants give it a unique appearance and brilliance.

This string competes with the most popular string in the market at a great price.

Length: 40ft/12m; 660ft/200m
Gauge: 17L (1.18mm) • 16 (1.28mm)
Cobr: Black

Construction: Carbon Co-Polyester
Advantages: Power combined with great control and feel.

Comparison: Compared to Black Ice, Black Widow.

PROTOUR

A softer co-polyester + carbon + polyethylene co-polymerized string.

The Protour provides the best response compared to other conventional polyesters. Its exclusive patented Low Molecular Weight Technology (LMWT) with added olefins and lubricants give it a unique appearance and brilliance.

This string offers you a SOFT feel yet powerful performance, while maintaining control and a nice "Pop" sensation when it hits the ball.

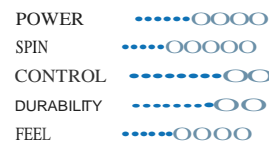

Try this amazing new technology!

Length: 40ft/12m; 660ft/200m
Gauge: 17 (1.23mm) • 17L (1.20mm) • 16 (1.27mm) • 16L (1.25mm)

Cobr: Blue, Fluo Yellow, Lime, Orange, Pink, White.

Construction: Top quality Co-Polyester mixed with enhancing additives.

Advantages: Feel and Control
Comparison: These are the nearest strings to RPM Blast and Focus (Protour Blue)

PENTA POWER

This is a pentagonal co-polyester monofilament with polyolefin from our Thermo Foil Cooling Process (TFCP) offering high performance that you'll notice.

The quality and feel of this new string is due to its new generation technology and patented processes in which the strings subjected to a molecular heating process and then cooled through an additional process to achieve a softer and more comfortable feel. and because of the profile it has, it increases the friction with the ball giving it a better effect.

Pentapower can also be used as a hybrid with any of the Protour strings.

Length: 40ft/12m;660ft/200m
Gauge: 16L(1.25mm) • 17L(1.24mm)
Color: Terracota

Construction: Top quality Co-Polyester pentagonal profile.

Advantages: More control

Comparison: Compared to Black Code.

 FEEL **eeeeeeO0000**

PENTAPOWER TWISTED

This pentagonal profile co-polymer with polyolefin from our Thermo Foil Cooling Process (TFCP) creates loads of bite on the ball giving you superb spin and control.

The technology used by this product offers the player excellent tension control, super power and durability.

This sensational string gives a superior game performance.

Length: 40ft/12m; 660ft/200m
Gauge: 16L (1.25mm)

Color: Terracota

Construction: Top quality Co-Polyester pentagonal profile

Advantages: Feel and Comfort

Comparison: Compared to Zo Twist.

POWER **eeeeeeeOO**
 SPIN **eeeeeeeOOO**
 CONTROL **eeeeeeeOOO**
 DURABILITY **eeeeeeeOO EI**

TRIVOLUTION BLACK

A unique triangle profile, carbon-impregnated string offering great "pop" off the racket face with a truly sensational feel.

The bevel-edged design provides a string bed with thin profiles in contact with the ball, which gives the mains and crosses a large surface area of flat edges, creating super durability and virtually no string movement.

This is an exceptional string that will, without a doubt, improve your game.

Length: 40ft/12m; 660ft/200m
Gauge: 16L (1.25mm)

Color: Black

Construction: Triangular - shaped monofilament with a special co-polyester + carbon + special polyolefin mix.

Advantages: Spin and comfort.

Comparison: No comparable string is available in the market from other suppliers.

POWER **eeeeeeeOO**
 SN **eeeeeeeOOO**
 CONTROL **eeeeeeeOOO**
 DURABILITY **eeeeeeeOO**
 FEEL **eeeeeeeOOO**

TRIPLE TWISTER SILVER

A triangular profile string that is then twisted offering extreme power, tension stability and minimal movement.

It's co-polyester construction with carbon + polyolefin also benefits from our Thermo Foil Cooling Process resulting in an exceptional playing experience.

Length: 40ft/12m; 660ft/200m
Gauge: 16L (1.25mm)

Color: Silver

Construction: Carbon Co-Polyester

Advantages: Triple quality co-polyester mixed with special additives ensuring consistency of the string bed.

Comparison: No comparable strings available in the market from other suppliers.

OCTO-TWIST

A softer co-polyester + carbon + polyethylene co-polymerized string that is then twisted and made through exclusive patented Low Molecular Weight Technology (LMWT) and added olefins and lubricants give it a unique appearance and brilliance.

This string offers you a powerful feel, while maintaining control and a "Ball Bite" sensation when it hits the ball.

This unique string offers good ball pocketing and control, ideal for hard hitting players.

Length: 40ft/12m; 660ft/200m

Gauge: 16 (1.28mm)

Color: Lime

Construction: Top quality Co-Polyester Octagonal profile with a special twist and with special enhancing additives for ball bite, power control and good feel.

Advantages: Feel and Control

Comparison: No comparable string is available in the market from other suppliers.

SYNTHETICS

MICROFIBER-X

This super durable gut-like string have 5 strands of microfiber core contained with a Premium Thermo Elastic resin formula in order to generate gut-like playability, plus durable character because of the firmly bonded for each microfiber.

Length: 40ft/12m; 660ft/200m
Gauge: 16 (1.34mm)

Color: Black
Construction: TPU microfiber.
Advantages: Control and Durability
Comparison: Compared NXT and X-One.

SYNTHETICS

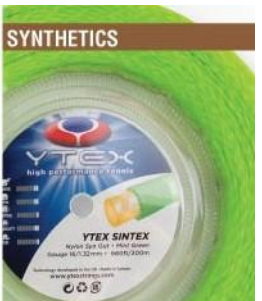

YTEX TOUCH

Highly responsive string for added touch, control, and power. Racquets will benefit from its resistance to string movement.

Nylon 66 multifilament central core surrounded with a fine row of monofilaments.

Length: 40ft/12m; 660ft/200m
Gauge: 16 (1.34mm)

Color: Natural
Construction: Nylon multifilament.
Advantages: Power combined with great control and feel.
Comparison: Compared to Sensation 16

SYNTHETICS

YTEX SINTEX

Outstanding liveliness and responsive performance. Enhanced touch and control. Multifilament DynaTech fibers (visible fibers technology) wrapped between high tenacity central core and nylon outer wraps. DuraCoat 6 outer coating.

Length: 40ft/12m; 660ft/200m
Gauge 16 (1.34mm)

Color Mint Green
Construction: Nylon syn gut string with multifilament fibers surrounded and coating with Duracoat.
Advantage: Comfort and Control.
Comparison: Compared to Syn Gut Duraflex 16

INTRODUCING OUR NEW CO-POLY PROFILE

Square-X

This is a square profile monofilament co-polymer + carbon + polyolefin string with a Thermo Foil Cooling Process finish. Two Flat surfaces, mains/crosses, in contact with each other give extra durability, no notching and the string returns very quickly from any movement after hitting the ball.

It measures 1.20mm across the flat sides and therefore plays like a much thinner string increasing power and control. We have only one word to describe this string: Unique!

Length: 40ft/12m; 660ft/200m
Gauge: 16L (1.25mm)
Color: Black, White

Construction: Carbon Co-Polyester
Advantages: Power combined with great control and feel.
Comparison: No comparable string is available in the market from other suppliers.
